Alternative Fuel Engine Catalytic Converter-Methyl Alcohol

FEATURES

- Integrated design, stable and reliable
- Universal deisgn, flexible interface matching
- Reduce noise greatly

APPLICATION

- Commercial vehicles
- New energy commercial vehicles

The product is applicable to methanol fuel and has regular shape and compact structure. Concave ribs-designed shell and bulging-designed end cover improve product mode and enhance product reliability.

MAIN TECHNICAL CHARACTERISTICS

PRODUCT SERIES

Product specifications (substrate diameter)	266.7mm
insertion Loss	>15dB
Pressure loss	<10kPA
