None-Road T4 Catalytic Converter (Vertical type)

FEATURES

- External decorative shield can isolate high temperature exhaust
- Efficient protection of electronic control parts, safe and reliable
- Less accumulation of dirt on surface due to regular appearance
- Fixed chassis, side pull, stable and reliable installation.

APPLICATION

- Commercial vehicles

The product integrates functions of purifier and muffler. It has regular structure and is highly integrated. With low pressure loss, high conversion efficiency, and sufficient mixer space, this product suitable for high-efficiency SCR with large displacement.

MAIN TECHNICAL CHARACTERISTICS

Product Series	None-Road T4 Catalytic Converter (Vertical type)
Adaptive vehicle type	Vehicles with vertical cabin layout (Tractors, excavators, etc.)
Applicable engine displacement	2-10L
Product specifications (substrate diameter)	143.8mm-266.7mm
SCR efficiency	≥98%
Pressure loss	≤25kPa
