HTBV: Hydraulic Trailer Brake Valve

- Dual line trailer brake valve provided with:
  - Command line (CL), for trailer brakes driving
  - Supplementary line (SL), for safe brake driving, in case of CL line fault
- Essential equipment for towed vehicles that must comply with EU norm
- Possibility for additional features to add to standard configuration and customization:
  - Integrated pressure-reduction valve
  - Possibility to choose from different piloting elements to modify input/output brake ratio

MAIN TECHNICAL CHARACTERISTICS

Brake ratio (input pressure/ output pressure)	According to customer request
Output pressure on CL	According to mother regulation
Output pressure on SL	According to mother regulation
